Risk Mitigation
- Personal protection
- Sanitation
- Structural configuration

Viral Detection
- Symptomatic testing
- Asymptomatic testing
- Environmental monitoring

Intervention
- Case isolation
- Contact tracing
- Exposure notification

Adaptability
ANIELA SCIOSCIA, M.D., Interim Executive Director of Student Health and Wellness

• How many faculty, staff and students should be on campus?
  ✓ Driven by community spread data

• How can we best reduce densities that might facilitate viral spread?
  ✓ Campus housing configuration – no more than 2 per bedroom
  ✓ Classroom sizes
  ✓ Co-curricular activities

• Physical and environmental assessment to enable “social distancing” measures
  ✓ Engineering review
Early detection
✓ Quickly identifying and providing care to any who becomes ill
✓ Actively looking for virus in environmental samples
✓ Periodic testing of asymptomatic faculty, staff and student for viral shedding

Isolation of infected persons while infectious
✓ Providing those living on campus with isolation housing with support
✓ Notification and support of those with exposure to infected persons

Adaptability to changing conditions and to what we learn

Reduction of risk of spread
CARING FOR INFECTED STUDENTS AND PREVENTING SPREAD

ANGELA SCIOSCIA, M.D., Interim Executive Director of Student Health and Wellness

• Student Health Services provides clinical care on campus for students with symptoms

• Dedicated housing on campus with a private bedroom and bathroom for any students living on campus who need to be isolated or quarantined
  ✓ Active health monitoring by Student Health Service
  ✓ Food and other services provided by UCSD Housing and Dining
  ✓ Academic instruction continues remotely
